

# Registering to use the ScARF wiki

The ScARF wiki can be read without the need to register to use the wiki or to login. However, registering with the wiki, and therefore creating a login, does have advantages and these will be discussed below.

## CREATING A LOGIN

1. In the top right hand corner of the wiki, select 'register', and you will see something similar to the screenshot below. (Note: Fields with an orange asterisk are compulsory and must be completed )

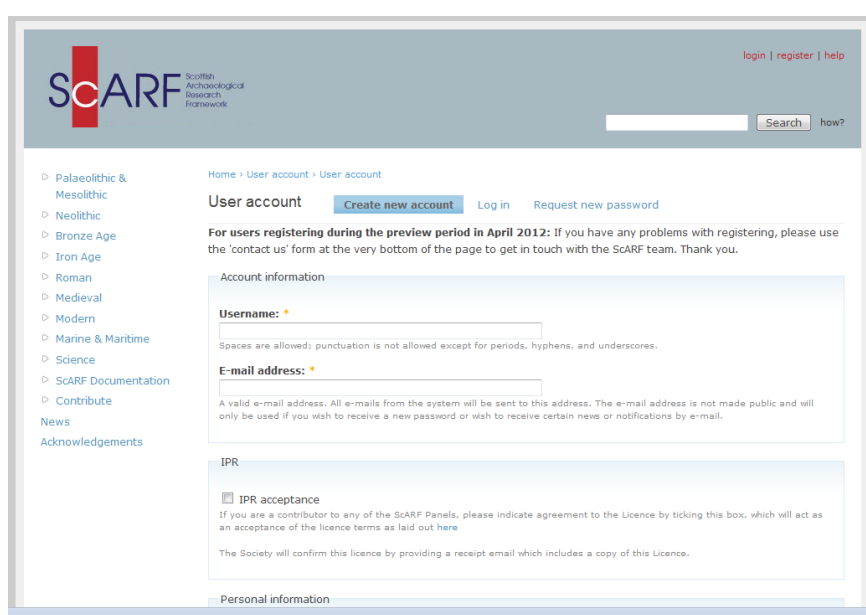

Figure 1: Screenshot of registration page

2. Give yourself a *username*, which can include spaces, periods, hyphens and underscores but no other characters. **This will be the name that represents you on the wiki, so choose wisely!**
3. Enter your *email address*. This will be used for all emails sent from the ScARF wiki, including passwords and other notifications.
4. If you are/have been a contributor to any of the ScARF panels, then please also tick the IPR acceptance box.
5. Enter your *first name, surname and organisation*. These are needed so that the ScARF team know who you are and your primary reason for registering on the site.
6. Finally, please select the *terms and conditions* box.
7. Select *create new account*.

Once you have registered for an account the ScARF team must approve the application before you can login to the site. This may take up to 24 hours. You will receive an email (at the address entered in step 3 above) with a link to ScARF. You need to follow this link and set your own password.
